

An annual contribution

The **yearly contributions** asked to the members of the communities may vary greatly from one province to another. The reference amount is 28€ per person per year, but each provincial team sets the amount of contribution according:

- To the basic minimum needs of a community in the province.
- To the needs of the province as determined by the Provincial Team in order to realize the activities decided by the Provincial Assembly.
- To the functional needs of the International Association as determined by the Board of Directors.
- The provincial team informs the International secretariat of the amount asked to its members, each year.
- The yearly contribution must never be an impediment to the participation to the life of the community.
